## SIP account at A1.net

Posted by ras - 2008/04/21 13:46

---

Updated Info 16 Oct 2008

A1 offers SIP accounts in Austria. Even if you are not a customer of A1, you can register an account at <http://A1.net/a1overip> (requires SMS confirmation at an Austria mobile phone). You may choose a free account. If you are already a customer with A1, with a classic account you can make net-out calls with your A1 number (in this case enter the voucher code 80000012 for a 6 months test period).

Next, download and install kvats. kvats.net is pre-configured with settings for A1.net. So you do not need to enter the parameters below, just enter username (with or without "@a1.net" ) and password.

If you want to configure access with A1 as a generic SIP account, here are the parameters:

User: A1.net username without "@a1.net"

Password: password of your A1.net user

Domain: a1.net

Server: a1.net

Outbound-Proxy: sip.a1.net

SIP Port: 5060

Hi!

Is it still possible to try the A1 VoIP service? I just registered (I own an Austrian mobile), but I always get "internal errors" on the web page... So there is no way to enter the voucher code - it is for entering on the web site, isn't it?

Kind regards,

Holli

For a free A1overIP account, please register with <http://www.a1innovations.at/>  
There you will get the new voucher 80000012, which is valid until 31 DEC 2008.

Now you do not need a voucher anymore.

If you have a mobile phone in Austria, you can simply register at A1.net and will get 50 free SMS.

For details see <http://www.a1.net/A1overIP>.

A1 recently switched to server-side-presence which currently nearly completely broke the presence feature in kvats. Presence changes of your contacts are not shown

---

reliable anymore.

A nice introduction on XCAP can be found here:  
[http://uctimsclient.berlios.de/xcap\\_server\\_howto.html](http://uctimsclient.berlios.de/xcap_server_howto.html)

If anybody is interested to fix this please drop us a mail.

World of Warcraft Instances are not there for the taking to wow gold be had whenever you want, let me explain. You need rs gold to be aware of a couple of things. You are wow gold cheap only allowed five Instances per hour. That means if you world of warcraft gold kill the boss to get its loot that you only rift platinum get five tries. That goes for all your characters so rift items no cheating with multiple characters. Always make sure you start runescape gold your Instance with as little in your bags as possible buy wow gold if you intend on just killing the mobs over and rift plat over. The loot builds up and before you know it your out of slots. Now, depending on what our find, how can you possibly profit from this tactic? Remember I mentioned those rare drops, well, I got one word for you: Twinks! Because your level is so much higher it means that you can do those Retro-Instances far faster and in far greater numbers than the Twinks can.
