## Adressen importieren

Posted by Walter P. Pyringer - 2008/09/03 00:29

---

hi guys,

frage: wie importiere ich nun all meine adressen in den kvats-client?

nachdem ich "viele" einzutragen habe, dh jedenfalls mehr als 2 kontaktadressen, scheint mir der weg zu "fuß" etwas zu mühsam ...

br wappy

Adressbuch - Import oder Synchronisation sind ganz oben auf unserer Prioritätenliste. Noch ist keine brauchbare Lösung verfügbar.

Bei den A1InnovationDays Days haben die Leute von bluelink erfolgreich ein <http://lab.netculture.at/wiki/doku.php?id=a1id:plugin> | Plugin für Thunderbird Mail gebaut.

Eine andere Schiene ist, mit SyncML oder OpenSync zu arbeiten. Die Kontakte liegen im kvats als XML Dateien vor, womit zumindest die wichtigsten Felder leicht über einen Sync Server (wie zyb.com oder memotoo.com) eine Synchronisation mit Handy und Mail-Client möglich wären.

In den nächsten Wochen werden wir dazu mehr wissen, wie wir weiter vorgehen. Weitere Lösungsvorschläge sind willkommen.

A year ago, my mother came back from Wuxi. My father and I went to the airport to meet my mother. Arrived in the airport not far from her mother saw her Tiffany Bangle Bracelets? on the neck and stuck her very elegant, in the hands of theDiscount Ladies Watches? seemed she was very noble. They make a mother shinier.
