

How to make my first call with kvats ?

You must connect to a SIP provider with your account and password, before making your first call. If you do not have a SIP account yet, we recommend that you get one at A1.net. They offer free accounts (no outgoing calls). If you have a contract with A1, your outgoing calls will be charged like a call with your mobile phone. Simply register at A1.net, if you do not have an A1 account yet.

You can dial a phone number, a SIP url (sip:user@sip-provider.com) or double-click on a nickname in your kvats contact list.
